

This person completed a primary vehicle replacement in order to stay in services. I have approved it but it didn't show up on her grid. Additionally, it still shows the old vehicle (that should be replaced). Please remove the old vehicle and replace it with the up to date and valid documentation for the primary vehicle replacement enrollment.

This person only has one of the 3 documents showing up on the grid.

Additionally, it's not even the correct document.

This person did a primary vehicle replacement enrollment. This document is for his initially enrolled vehicle.

Please make this document/vehicle disappear, and make all 3 of his valid/up-to-date documents appear on the grid.
